

# ...the Unique Dust-Smart System from PHS Treadsmart

The dust control system designed for professionals by professionals

Create dust free,  
shiny floors

in less time

without using water

using our unique  
exchange service

The Dust-Smart system holds twice as much dust as regular dust mops and is designed to outperform standard dust control products.

The system features cotton fibres impregnated with a lemon scented bacteriostatic fluid for a truly effective dust control solution that traps dust and leaves no residue.

The treated mop fibres ensure maximum dust cleaning and disinfectant power, absorbing dust and dirt, leaving floors cleaner and shinier in less time and with less effort.

The unique service ensures your dirty Dust-Smart mops are exchanged every two weeks for clean ones, so your dust control system is always ready to use, removing the need and hassle of mop washing.

## Suitable for use on all hard floors – wood, stone, vinyl etc

- Create cleaner, shinier, dust free floors
- Reduce cleaning time by up to 50 %  
- Sweeps, cleans and shines all in one smooth action
- No need for additional water or cleaning products  
- Reduce slip risks with an instantly dry surface  
- Reduce spend on cleaning products  
- Offers environmental benefits
- Eliminate the need to continually purchase or wash your dust control mops

Available in a range of sizes, the Dust-Smart system is ideal for use in all hard floor areas
