

PHS Washrooms Case Study

Aquila Truck Centres Ltd.

The UK's largest franchisee of MAN and ERF trucks, Aquila Truck Centres Ltd. has six sites throughout the West Midlands, with around 300 staff. Like many other forward-thinking companies, Aquila is moving towards gaining ISO 14001 status, with a complete overview of working practices to ensure that they are as environmentally sound as possible.

In order to help ensure that the company's washrooms meet environmental requirements, Aquila has installed 20 high speed, low energy Airforce™ hand dryers across its six sites.

Airforce is an innovation in hand drying, designed by World Dryer Corporation, the world leader in hand dryers for over 60 years, and available exclusively from PHS Washrooms.

Airforce's 1.1kW/h low power output ensures that huge energy savings can be made, and also helps to keep washrooms clean, tidy and hygienic.

Common Problems:

- High energy use
- Inefficient dryers
- Water splashes on wall and floor
- Dryers have potential dirt traps due to design
- Plastic covers can age quickly

PHS Solution:

- Installation of PHS Airforce™
- High speed, low energy, just 1.1 kW/h power output
- Incorporates SteriTouch® antibacterial surface protection, dramatically reducing spread of bacteria such as MRSA, e-coli and Salmonella
- Designed by World Dryer Corporation, world leaders in hand dryers for over 60 years
- 11 air outlets offer wide distribution of airflow, increasing comfort and reducing dry time
- Die-cast aluminium cover means dryer is sturdy and long lasting; smooth design ensures no dirt traps

"As a company that is moving towards ISO 14001, we are delighted with the Airforce hand dryers as they save us energy, time and money but dry hands more comfortably than our previous dryers - we win in every way!"
