

Bird flu

Protect your staff and your business

Bird flu (Avian Influenza) could infect more than 25% of the UK population, doubling the number of employee sick days*. The virus is spread by breathing in droplets from an infected person talking, coughing or sneezing, or by touching an infected person or a contaminated surface before touching your own, or someone else's face.

*Chief Medical Officer, Oct 2005

The two advised methods to prevent spread are:

- A barrier - masks
- Removal - hand sanitiser, disinfectant spray and antibacterial soap

PHS Direct can provide all the necessary products to protect you, your staff and their families.
