

Flush-active®

Helps maintain hygienic WCs and urinals

Flush-active targets the surface of the toilet bowl and other hard to reach areas, powering away hard water stains and reducing the build up of limescale with its foaming action, leaving the bowl clean, freshened and effectively sanitised.

Key Features

- Fits any cistern
- Can help to reduce deep cleaning costs
- Releases a subtle red berry fragrance

Maintain Hygiene

The Flush-active is designed to be installed into a cistern, and is suspended from the cistern edge so it is partly submerged. It contains five water soluble sanitising blocks, which deliver a gradual release of sanitiser into the flush water.

This ensures that on every flush, all areas of the toilet bowl are treated, effectively eliminating bacteria and leaving the bowl clean, freshened and thoroughly sanitised.

Fully Serviced

The Flush-active is a fully serviced item, with PHS ensuring that it is always fully functioning and dispensing sanitiser into the cistern without any input from your staff.

After every service, you'll receive an immediate automated email confirmation detailing the site and products serviced. We'll provide a time-captured signature, showing exactly when your service was carried out and who acknowledged our visit, so you can be sure you've got a complete service audit trail.

Dimensions

5cm x 19cm x 6cm

Weight

60.5g

Installation

Designed to hang inside the cistern, it features an adjustable bracket at the top of the unit, which can accommodate varying thickness of cistern wall. Suitable for use with septic tanks.
