

# Flush-wiser® WC Flush Control

Reduce water usage without compromising on hygiene

The award-winning Flush-wiser is designed to reduce water consumption in WCs without compromising on hygiene. It attaches to the siphon in the cistern and can reduce the amount of flush water by up to 3 litres.

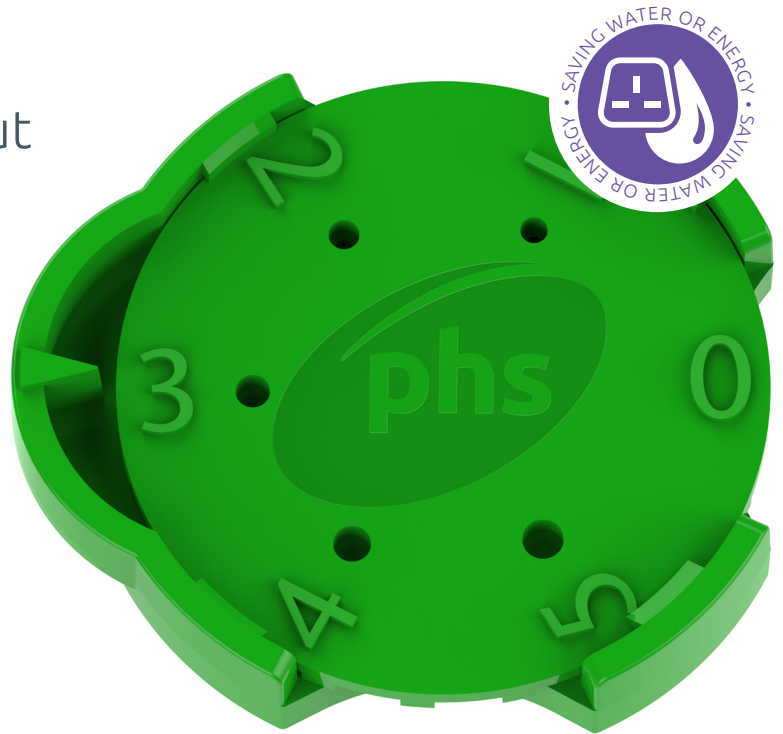

## Key Features

- Adjustable to tailor the amount of water saved
- Offers quick return on investment by instantly reducing water bills
- Reducing your water usage helps you reach sustainability targets
- Quick and easy to install and lasts the lifetime of the WC

## Save Water, Save Money

With every flush, toilets are literally flushing your money away, however by installing the Flush-wiser® flush control you can reduce the amount of water being used, and make instant savings.

The Flush-wiser is fully adjustable, allowing you to determine the amount of water to save on each flush, which can be up to three litres, making substantial savings and a significant difference to your water bill.

## Efficient

The Flush-wiser was awarded the British Institute of Facilities Management Excellence Awards 'Innovation (New Product)' Award. It is also a WRAS approved product and holds the Waterwise Marque which is awarded to products which reduce water wastage or raise awareness of water efficiency.

The Flush-wiser is installed by PHS service technicians, and once fitted lasts the lifetime of the WC.

## Installation

Suitable for use with all single flush, close couple siphon toilets. It cannot be used in WCs with dual flush option.
