How we can help

Running a care home today means managing a number of priorities, including patient wellbeing, premises, recruiting and retaining the best people as well as adhering to the many requirements of regulatory bodies.

Helping to provide a clean, comfortable and safe home for some of society's most vulnerable people is a responsibility that **phs** takes incredibly seriously.

We work with over **6,400** care homes throughout the UK, providing everything from washroom amenities to legally compliant waste disposal. In short, we help to ensure that residents can access everything they need for a happy, healthy life.

Are you compliant? The **CQC** (Care Quality Commission) inspects standards of cleanliness and hygiene in care homes. Our experts can help to ensure that your organisation has the correct measures in place.

Healthcare, washroom and floorcare hygiene are our business. We stay on top of all the legislative developments affecting your industry to provide you with expert advice on what you need to do to ensure that your business is legally compliant. We also help with practical advice on how to manage CQC audits and other regulatory requirements.

Our professional service drivers provide a discreet and **efficient service**, calling ahead to check that our servicing times are convenient for your business. And, if any of your products or services need change, we're just a call away and have the flexibility to adapt to whatever is needed.

We're in every geographical area and because we're **Next door. Everywhere**, we are on hand to help wherever you are. And as a single supplier, meeting all your needs, we can help reduce your day-to-day administration commitment as well as your financial costs.

Our nursing home blueprint shows the most in-demand services we currently provide to the care sector.

34, Environmental Protection Act 1990

Anyone who produces, stores or disposes of waste has a duty of care to ensure that waste is managed properly.

- ✔ Waste must be stored safely and securely
- ✔ It must be prevented from causing environmental pollution or harming anyone

WE CAN HELP

Traditionally, our most in-demand services for the care sector have included waste management, safety and washroom services, but we are increasingly meeting the wider needs of providers in this sector with a wide range of services.

Legally compliant waste disposal

- We provide facilities for the storage of healthcare waste and infectious clinical waste and a safe, discreet and efficient service to collect and dispose of it.

Staff and patient well-being

- Our services provide you with the highest standards in welcoming, pleasant working and waiting environments, safe and hygienic, fully serviced washrooms, equipped with everything from sanitary bins to hand dryers. We also provide the basics such as hand sanitisers, soap and toilet paper.

Reduce the risk of trips and falls

- From reception areas to communal lounges and bathrooms, dirt and water can reach all corners of a care home. Our specially-designed serviced mats soak up dirt and water to reduce the risk of trips and falls, with environmentally-conscious laundering also provided to keep your floors fresh and clean.

Air quality

- With air quality an issue in many inner-city areas and indoor air containing up to five times more contaminants than outdoor air, we also provide air purification products that improve the air quality of our customers' practices, to create a safer and more hygienic environment.

Adhere to legislation

We will ensure that safety and hygiene at your care home is handled strictly in line with current legislation and according to best practice guidelines.
