## How we can help

## Principle 3, Standards for registered pharmacies

- The environment and condition of the premises must safeguard the health, safety and wellbeing of patients and the public.
- ✔ Must be safe, clean, properly maintained and suitable for the pharmacy services provided
  - ✔ Must be maintained to a level of hygiene

### WE CAN HELP

Traditionally, our most in-demand services for chemists have included hygiene supplies, washroom maintenance and floorcare. Our experts continue to meet the needs of organisations in this sector with a wide range of products and services.

#### High levels of hygiene throughout your premises

- When dealing with ill members of the public, proper hygiene protocol is essential to prevent germs and infection from spreading. **phs** can supply everything your dispensing team needs to keep unwelcome bacteria and viruses from lingering on your premises, including hand and surface sanitisers.

#### Advice on staying legally compliant

- In a tightly regulated industry, it's not always easy to stay on top of every rule and regulation that staff must abide. Our professionals stay up to date on all relevant health and hygiene legislation and can provide expert advice on everything your team needs to remain on the right side of the law.

#### Reduce the risk of accidents in your pharmacy

- With people regularly entering and leaving your building, shoe-borne dirt and moisture can end up spreading around the pharmacy, leaving patients and staff vulnerable to slips and trips. Our absorbent non-slip entrance mats tackle this issue at the source, removing muck and water before it becomes a hazard.

#### Washrooms equipped for every circumstance

- Whether the washrooms in your pharmacy are used by customers or staff, it's important that they follow the same high standards of hygiene as the rest of your premises. **phs** can provide regular service visits to keep your washrooms in pristine working order, as well as topping up consumables such as soap and toilet roll.

As one of the first ports of call for members of the public looking for medical advice and remedies, it's important for dispensing chemists to maintain high levels of hygiene, thereby reducing the risk of infection within their premises.

Yet in a busy public environment, it's not always easy for chemists to remain vigilant of hygiene and health risks, particularly when supplies of key products, such as soap and surface sanitiser are running low. At **phs**, we work with over **12,500** chemists to provide a valuable and safe service to the public, supplying essential products and solutions to keep the workplace clean and compliant.

Choosing **phs** as your single supplier will also help to reduce excessive admin and paperwork, allowing your professionals to focus on what they do best: providing the public with reliable and helpful advice on their health.

**Improper management of waste isn't just illegal – it's also expensive.** At **phs** Group, we can take the hassle away and support you to reduce your financial burden.

**Healthcare, washroom and floorcare hygiene is our business.** We stay on top of all the legislative developments affecting your industry to provide you with expert advice on what you need to do to ensure that your business is legally compliant.

Our professional service drivers provide a discreet and efficient service, calling ahead to check that our servicing times are convenient for your business. And, if any of your products or services need change, we're just a call away and have the flexibility to adapt to whatever is needed.

We're in every geographical area and because we're **Next door. Everywhere**, we are on hand to help wherever you are. And as a single supplier, meeting all your needs, we can help reduce your day-to-day administration commitment as well as your financial costs.

**Our dispensing chemists blueprint shows the most in-demand services that we currently provide to the pharmaceutical sector.**

### Adhere to legislation

We will ensure that safety and hygiene at your chemist is handled strictly in line with current legislation and according to best practice guidelines.
