Running a dental practice today means managing a number of priorities including staffing, budgets, premises and patient treatments as well as adhering to the many requirements of regulatory bodies.

It takes time to be an expert in everything to do with managing a safe and compliant dental practice and that's where we can help.

We work with **2,669** dental practices throughout the UK to meet their waste disposal needs, providing a seamless service for dental sharps, amalgam products, teeth and hygiene waste.

**Are you compliant?**  
Did you know that **phs Group** are on hand to help you complete your pre-acceptance audit? A regulatory requirement imposed by the Environment Agency.

**Healthcare, washroom and floorcare hygiene is our business.** We stay on top of all the legislative developments affecting your industry to provide you with expert advice on what you need to do to ensure that your business is legally compliant. We also help with practical advice on how to manage CQC audits and other regulatory requirements.

Our professional service drivers provide a discreet and efficient service, calling ahead to check that our servicing times are convenient for your business. And, if any of your products or services need change, we're just a call away and have the flexibility to adapt to whatever is needed.

We're in every geographical area and because we're **Next door. Everywhere**, we are on hand to help wherever you are. And as a single supplier, meeting all your needs, we can help reduce your day-to-day administration commitment as well as your financial costs.

**Our dental practice blueprint shows the most in-demand services that we currently provide to the dental industry.**

## Regulation 21 of the workplace

(Health, Safety and Welfare) Regulations 1992 (UK)

- Washing facilities must include:**
- Towels or other suitable means of drying
  - Soap or other suitable means of cleaning

### WE CAN HELP

Traditionally, our most in-demand services for the dental industry have been staff and patient well-being, and legally compliant disposal of waste, but we are increasingly meeting the wider needs of successful modern dental businesses with a range of services:

#### Staff and patient well-being

- Our services provide you with the highest standards in welcoming, pleasant working and waiting environments, safe and hygienic treatment rooms and hygienic, fully serviced washrooms, equipped with everything from sanitary bins to hand dryers. We also provide the basics such as hand sanitisers, soap and toilet paper.

#### Legally compliant waste disposal

- We provide facilities for the storage of healthcare waste and infectious clinical waste and a safe, discreet and efficient service to collect and dispose of it.

#### Cosmetic procedures

- As many of our customers extend their services to meet the increasing demand from their patients for botox and lip-fillers, we provide compliant purple cytotoxic containers as well as yellow sharps bins.

#### Air quality

- With air quality an issue in many inner city areas and indoor air containing up to five times more contaminants than outdoor air, we also provide air purification products that improve the air quality of our customers' practices, to create a safer and more hygienic environment.

### Adhere to legislation

We will ensure that all of your sharps waste is handled strictly in line with current legislation and according to Best Practice Guidelines.
