AIR PURIFIER

How we can help

Guidance on Infection Control in Schools, 2016

Handwashing is one of the most important ways of controlling the spread of infections, especially those that cause diarrhoea and vomiting, and respiratory disease.

Washing facilities must include:

- ☑ The recommended method is the use of liquid soap, warm water and paper towels
- ☑ Always wash hands after using the toilet, before eating or handling food, and after handling animals

WE CAN HELP

Traditionally, our most in-demand services for primary schools have included washroom maintenance, floorcare and hygiene services. Our experts continue to meet the needs of establishments in this sector with a wide range of products and services:

Avoid slips and trips at school

- Excitable young pupils may not always take the appropriate level of care when moving around your school. Wet and dirty floors can be particularly hazardous, and may cause injury through slips and trips. Our serviced mats can help, providing extra grip on slippery surfaces while soaking up dirt and moisture from shoes.

Everything that pupils and staff need

- Dirty or unhygienic facilities can have a negative effect on morale within the school. Having access to everyday essentials, such as soap, toilet roll, quiet hand dryers and paper towels, will mean that both teachers and students can feel comfortable and focused on their lessons.

Prevent bugs from spreading

- With close proximity to their fellow pupils, children can easily become infected by bacteria and viruses within the classroom. Having the right hygiene precautions in place, such as well-maintained handwashing facilities with liquid soap and paper towels, will help to minimise the risk of germs spreading and causing students to take time off school.

Clean and reliable washrooms

- If washroom facilities become broken or damaged, it can cause disruption to school activities and place additional stress on teachers. **phs** has accredited service teams in every location, so if your washrooms become damaged you can be certain that our experts will be able to fix them quickly and effectively.

Primary education plays a crucial role in the development of children – not only in terms of academic achievement, but also in developing valuable life skills.

For young pupils to get the best start to their education, it's important that primary schools are equipped with everything they need for a safe and comfortable learning environment.

Proper hygiene is a key part of this. Schools equipped with the right facilities (such as clean toilets and handwashing facilities) help to ensure the safety and wellbeing of their children, while setting high standards of hygiene from a young age. We work with over **19,000** primary schools throughout the UK to provide everything they need for a clean and welcoming school.

By installing the right products, **phs** can help your primary school to reduce water and energy bills, as well as reducing your environmental impact.

Healthcare, washroom and floorcare hygiene is our business. We stay on top of all the legislative developments affecting your industry to provide you with expert advice on what you need to do to ensure that your school is legally compliant.

Our professional service drivers provide a discreet and efficient service, calling ahead to check that our servicing times are convenient for your school. And, if any of your products or services need change, we're just a call away and have the flexibility to adapt to whatever is needed.

We're in every geographical area and because we're **Next door. Everywhere**, we are on hand to help wherever you are. And as a single supplier, meeting all your needs, we can help reduce your day-to-day administration commitment as well as your financial costs.

Our school building blueprint shows the most in-demand services that we currently provide to the primary education sector.

Adhere to legislation

We will ensure that safety and hygiene at your school is handled strictly in line with current legislation and according to best practice guidelines.
