

PHS Work Matta™ – fitted

PHS Work Matta™ is a 25mm modular, anti-fatigue surfacing engineered to tolerate the harsh conditions of industrial and manufacturing environments whilst promoting well being and fighting fatigue.

> Key features

- Annual safety Inspection (1 pa)
- 3 or 5 Year Agreements
- Made from 85%+ recycled content
- End of life recyclable product
- ASTM, ADA & UFAS Accessibility Standards
- Wear resistance heavy to extreme
- Available in Grit Finish for oily environments
- Available in open or closed formats

All Work Matta™ flooring tiles utilise a unique compression column construction, specifically engineered to encourage proper body alignment, while promoting a calculated degree of movement or 'sway'. This almost imperceptible motion stimulates the muscles and promotes the efficient circulation of blood through the veins – especially in the legs – which is key to preventing worker fatigue and discomfort.

WHY ARE EERGONOMICS SO IMPORTANT?

Oxygenated blood is pumped by the heart, through arteries, around our body which uses the oxygen as fuel. The blood then returns, via the veins, to our heart and lungs for 'refueling' and the process begins again with re-circulation of oxygenated blood through the arteries. Blood pressure and the normal contracting and relaxing of muscles around veins as we move, facilitates the return journey of blood through the one-way valve system in veins. This process can be inhibited when we have to stand on a hard surface or our movement is restricted for prolonged periods. Work Matta™ ergonomic flooring is designed to help promote efficient blood circulation.
