

# AERAMAX PROFESSIONAL air purifier

## Protect your students and staff

More than 3 in 5 (61%) people in the UK think air purifiers should be mandatory in all indoor environments to help curb the spread of viruses. With this in mind, are you doing enough to protect your students and staff against the airborne transmission of COVID-19 in interior spaces?

### The problem

To truly make classrooms safe, we need more than social distancing and increased handwashing. COVID-19 can spread through the air and classrooms are a breeding ground for germs; with young respiratory systems more susceptible to irritants that can aggravate childhood allergies and asthma.

Over the past few months, many children and adults have had to sit in cold classrooms for several hours a day, as windows are being kept open to ensure clean air is circulated. Many schools also haven't been able to turn their heating systems on this winter, as it's connected to the air conditioning system and could end up circulating infected air.

But there is an easier solution! By installing air purification devices in your classrooms, you can create a learning environment that is safe and comfortable for both students and teachers.

### How it works

#### Key benefits from hybrid 2-in-1 filter

- 1 A pre-filter captures and removes large particles and contaminants.
- 2 Carbon filtration adsorbs odours and VOCs.
- 3 True HEPA filtration traps 99.97% of any remaining airborne pollutants\*. Antimicrobial treatment on the HEPA filter effectively reduces the development of bacteria and fungi on the filter.
- 4 PlasmaTrue™ Bipolar Ionisation electrically charges airborne particles to enhance filtration.

\* as small as 0.3 microns

### The solution

**AERAMAX Professional** Air Purifiers effectively capture 99.97% of airborne contaminants, including flu viruses, germs, allergens and odours, resulting in clean air and a healthier environment for visitors and employees.

#### Ideal for use in :

- **Classrooms** - removing up to 99.97% of airborne contaminants.
- **Staff Rooms** - the patented EnviroSmart Technology automatically detects when to purify the air, reducing contaminants quickly and efficiently.
- **Changing Rooms and Toilets** - Harmful germs and unpleasant smells make way for a cleaner, healthier environment.

#### Order your device today

**AERAMAX Professional** Air Purifiers are available on fuss-free serviced contracts from **phs Group**. Our expert technicians will install and maintain your device, ensuring it's always working efficiently.
