

COVID lateral flow testing bin

> Hygienically dispose of waste generated by COVID rapid testing.

Premises undertaking regular rapid testing should have a safe waste disposal process in place. The COVID lateral flow testing bin is a fully serviced and fuss-free solution that will help keep premises safe, providing a secure way to dispose of PPE and related waste.

KEY FEATURES

- No-touch hygienic operation
- Cleaned with **phs** Bio sanitiser spray
- Fully compliant with waste regulations
- Braille text on lid included as standard
- Made from durable material

BENEFITS

- An easy and safe solution for premises generating increased waste because of regular rapid COVID testing
- Can be used for paper towels, face masks, disposable gloves, and related PPE waste
- Pedal operation removes the need for hand contact and reduces the risk of cross infection
- Privacy flaps under the lid keep waste fully sectioned off
- Service agreement ensures waste is being safely disposed of

Hygienic touch free operation

This bin is pedal operated for increased safety, this, removing the need for hand contact and reducing the risk of cross infection. Serviced bins will be treated with a spray treatment that meets EN 1276 requirements. This reduces bacteria levels by 99.9% and passes EN14476 regulation. This germicide conforms to EN1276, EN13727.

Product specifications

Usable capacity	45L
