

> phs SteriHandles

Reduce the risk of germs lingering on key touch points.

phs SteriHandles will reduce the risk of cross-contamination through interior door handles, killing 99.99% of bacteria in less than one second. The touchable components of these handles are coated with **Nitropep®** anti-microbial treatment, in collaboration with **Rubig-N+ technology ©**.

BENEFITS

- Reduces the risk of spreadable viruses with a higher than 99.99% bacterial kill rate, killing germs in seconds.
- Will complement existing hand hygiene measures, improving hygiene and safety for employees, customers, and visitors.
- Two touchable components annually replaced by **phs** technicians.
- Can be easily fitted to any door, making it ideal for use in all interior environments including Retail, Education, Medical, and Care Facilities.
- Independently verified and tested by IMSL, an independent test laboratory.
- Made from durable stainless steel, ensuring the handles are tamper-resistant.

KEY FEATURES

- Coated with anti-microbial treatment.
- Made from stainless steel.
- Available in both push and pull options.
- Permanently fixed to the door by **phs** technicians.
