

Contamination Mats

> A heavy duty brush fibre mat with sanitising liquid to scrub and disinfect the soles of footwear.

Contamination mats can be used to create a barrier to prevent viruses being spread through buildings.

KEY BENEFITS

- Reduce the risk of contamination in your premises by preventing the spread of bacteria.
- Mat can be filled with a disinfection solution to meet your specific needs.
- Brush fibre surface cleans soles of footwear to stop the spread of dirt.

KEY FEATURES

- Spill Control borders allow for containment of up to 4.1 ltrs of disinfecting liquid per m²
- Mono Filament Brush fibres scrub soles clean to remove dirt
- Resistant to most chemicals such as bleach and other disinfectant solutions
- Nitrile rubber backing offers excellent slip resistance

Specifications
