

MAXI XTRA and MAXI DISCREET

> Hygienically dispose of nappy, incontinence, or PPE waste.

Fully serviced

phs nappy bins are provided with a service agreement which is tailored to meet the footfall needs of each site. This incorporates a complete liner exchange service, with bins fully cleaned on site before a new liner is inserted.

Hygienic touch free operation

Both units are pedal operated, removing the need for hand contact and reducing the risk of cross infection. Serviced bins will be treated with a spray treatment that meets EN 1276 requirements. This reduces bacteria levels by 99.9%, and passes EN14476 regulation. This germicide conforms to EN1276, EN13727.

Benefits

- Pedal operation removes the need for hand contact and reduces the risk of cross infection.
- Privacy flaps under the lid stop the user seeing waste as the lid is opened.
- Odour Capture pads are located on the underside of the lid to contain any unpleasant smells.
- Service agreement ensures waste is being correctly sorted and disposed of.

Key features :

- No-touch operation
- Made from durable material
- Cleaned with **phs** Bio sanitiser spray
- Fully compliant with waste regulations
- Braille text on lid included as standard

MAXI XTRA and MAXI DISCREET

Environmental Impact

Sanitary and Nappy waste collected by **phs** is disposed of via our LifeCycle strategy. This strategy diverts customer waste away from landfill. It is instead taken to nearby energy recovery facilities where it is turned into power for the local community to use, providing a sustainable waste solution.

Fully compliant

phs are fully licensed and compliant with all waste management regulations including Duty of Care. A full auditable waste trail is provided, offering peace of mind that your sites' waste is being dealt with safely and with respect for the environment.

Swabs and Dressing Waste Bin Option

To complement our nappy bin solutions, we also offer a Swab and Dressing bin solution for infectious waste. This fully serviced unit offers the same features and benefits as our nappy bins. However, it also comes with colour coded liners to help identify the type of infectious waste it can be used for, ensuring waste is disposed of correctly.

Due to the nature of this unit, it comes with a 24/7 free emergency product service, helping you deal with unforeseen issues or unexpectedly high numbers.

phs are available 24/7 to take your calls and will carry out an emergency service on the next working day; working days are Monday - Saturday.
