# M&E installation and building services

**PHS Compliance supports your building services, design and construction projects with professional M&E installation services.**

## Electrical, mechanical & air conditioning services

We'll support lighting maintenance and new installations with energy-saving payback calculations for low-energy lighting projects. We specify optimal lighting solutions to fit your requirements. We support financing applications to Carbon Trust Energy Efficient Financing & ECA through our collaborations with accredited suppliers.

We carry out electrical and mechanical installation projects for a range of new build, fit-out and refurbishment customer requirements.

We've delivered this work for a wide variety of large industrial, commercial and public sector organisations and have advised customers on the most appropriate technical solutions for their specific needs.

### We support projects including

- energy-saving lighting
- emergency lighting
- lighting detection and sensing systems
- re-lamping & control gear replacement
- distribution boards & energy metering
- LV panel and maintenance, sub-main cabling, earthing systems
- conventional & addressable fire alarm systems, electrical projects for power, data, CCTV, HVAC and security/access, electrical small works

**We have a rigorous and comprehensive quality management system, and hold NICEIC Approved Contractor status alongside all other relevant industry body accreditations.**

Part of the award-winning PHS Group, we help more than 2000 customers across the UK assess, manage and audit their safety compliance obligations. We are a single supplier of electrical, fire, air conditioning and commercial gas safety services.
