

Lift car mats

> A fitted mat solution designed specifically for lift cars.

Lift cars typically have either carpet tile or hard surface finishes on the floors. Fitted mats prevent slip and trip hazards of surface finishes and costly maintenance for carpets.

The twisting and turning action required to press elevator buttons also make lift cars an ideal place to fit a mat. Lift car mats will therefore scrape off more dirt from the soles of feet than in other areas across a premises.

Available in 12 different colours, and as an image mat, fitted mats are an ideal solution as they negate any clearance issues within the lift car.

Key features :

After the entrance mats, the lift mat is the next most important place to capture dirt coming into a large building. Often overlooked, they can present the first impression for someone entering from reception to the main building.

Key benefits :

Lifts are typically high traffic spaces where people have recently entered the building. Dirt deposits are high as people shuffle together in the small space. Lift mats address this problem by capturing dirt in the mat which can then be properly serviced.

ECONYL®
Made with 100% Regenerated Nylon

Product specification

Sizes	Mats can be fitted to any size of lift
Thickness	10mm
Colour	Available in 12 colours, including, Amethyst, Diamond, Earth, Emerald, Jupiter, Mars, Mercury, Moon, Neptune, Ruby, Uranus, Venus. Also available as an Image/Logo mat.
