

> phs Urinal Floor Mats

A hygienic solution to keeping your washroom floors dry and protected against slips & falls from wet floors.

Urine spills beneath urinals are an age old problem in gents washrooms which lead to footborne traffic transferring this onto soft carpeted surface outside the washroom area.

Mopping the floor regularly increases costs whilst moving the urine around the washroom causing it to rest within the porous grout between floor tiles and corners and creates more odours.

phs' highly absorbent Urinal Floor Mats captures these spills effectively and inhibit the related odours with their silver ion based anti-microbial treatment which are regularly serviced by **phs** removing the hassle.

90% of all slips occur when the floor is wet.

Key benefits:

Minimises the slip hazard in washrooms between cleans

Enhances the look & safety of your Washroom

Minimises odours - Anti-microbial treatment provides protection from odours and inhibits microorganisms

Protects Floors - Seep-Guard barrier eliminates urine seepage, protecting floors against the damage caused by uric acid

Eco-Friendly - rPET textile surface is made from 87% post-consumer recycled plastic bottles

Hassle Free - **phs** replace the top layer whilst servicing the other items on site such as sanitary bins
