

# Swabs and **dressing disposal**

> Helping your premises stay safe and compliant

The swabs and dressings disposal container has been specifically designed for the safe disposal of both clinical and hazardous swabs and dressings waste from a range of environments.

## Practical and hygienic

The unit is pedal operated, removing the need for hand contact and reducing the risk of cross infection. Made from strong polypropylene for durability, the units are scuffresistant.

## Fully serviced

The unit is provided with a service agreement which is tailored to meet the footfall needs needs of the site. This incorporates a container exchange so on every visit the in situ unit is exchanged for a clean, sanitised unit.

After every service, you'll receive an immediate automated email confirmation detailing the site and products serviced. We'll provide a time-captured signature, showing exactly when your service was carried out and who acknowledged our visit, so you can be sure you've got a complete service audit trail.

## Efficient

The unit is provided with our 24/7 free emergency product service, helping you deal with unforeseen issues or unexpectedly high numbers. We're here 24/7 to take your calls, and will carry out an emergency service on the next working day (working days are Monday- Saturday).

## Fully compliant

**pHS** are fully licensed and compliant with all waste management regulations including Duty of Care. A full auditable waste trail is provided, offering peace of mind that your sites' waste is being dealt with safely and with respect for the environment.
