

# First aid kit

➤ Be prepared and comply with health and safety regulations

All workplaces are legally required to keep a fully stocked first aid kit on site at all times to ensure that employees and visitors are properly prepared for any accidents.

The first aid kit service includes regular checking and restocking of your first aid kit, ensuring you have the necessary supplies on site removing the hassle and responsibility from your staff.

### Practical

Available in a choice of sizes with contents suitable for either 10 or 20 people, our first aid kits are ideal for all sizes and types of premises.

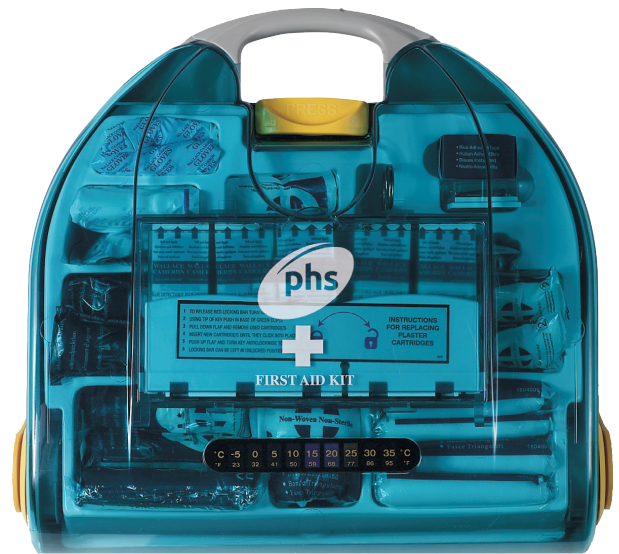

### Fully compliant

Not only do our first aid kits ensure you're prepared in the event of an accident occurring but they're fully compliant with BS8599 and regularly serviced in accordance with legislation changes, meaning that you're always fully compliant with first aid regulations.

### Fully serviced

The kit is provided complete with a service agreement which includes regular checking and restocking of your first aid kit, ensuring you have the necessary supplies on site removing the hassle and responsibility from your staff.

After every service, you'll receive an immediate automated email confirmation detailing the site and products serviced. We'll provide a time-captured signature, showing exactly when your service was carried out and who acknowledged our visit, so you can be sure you've got a complete service audit trail.
